

PLAINS
ALL AMERICAN

Plains All American is engaged in the transportation, storage, terminalling and marketing of crude oil, refined products and liquefied petroleum gas and other natural gas related petroleum products. Positions available in the following location:

Mechanical Tech – Long Beach, CA

Major Duties: Performs required scheduled and unscheduled mechanical maintenance on pumps, valves, engines, tank mixers, etc. Performs pump to motor alignments. Maintains maintenance records and evaluates wear and repair needs and trends of pipeline equipment. Maintain assigned tools required to perform job duties. Position will be subject to call outs for work associated with Plains field operations and/or emergency response.

Other Qualifications/ Training: Must have a high school diploma or equivalent with strong communication, interpersonal skills and the ability to perform basic math.

Should have a working knowledge of tolerances, clearances and related operating parameters of equipment. Basic electrical knowledge is required. Some knowledge of welding and welding procedures is helpful in job.

This position requires pipeline knowledge, experience, and capability to deal with pump station/pipeline issues. This person must be a self-motivator and willing to take on a range of pipeline responsibilities. High School diploma or equivalent. Must be able to read and comprehend technical operational manuals to interpret equipment manuals and service notices and related data. Knowledge of pipeline mechanical equipment maintenance and repair (i.e. engines, pumps valves, actuators, etc.). Ability to complete Haz-Mat training, safety programs, and meet minimum D.O.T. qualifications.
